## 1.6.54 Release Notes

Version 1.6.54 includes some new features and important improvements to pricing updates that you should be aware of.

### New Feature(s)

Remove revisions to reset bid submission status

The screenshot displays the 'Submitted Orders' section of a software interface. At the top, there are three tabs: 'New Orders' (7), 'Re-Submitted Orders' (1), and 'Pending Dealer Approval' (9). Below the tabs, the main heading is 'Orders Returned From Dealer' with a sub-note: 'These bids have been resubmitted by the dealer with changes made'. A search bar is present with the placeholder text 'Type to Search'. Below the search bar is a table with columns for 'Job #', 'Name', and 'Dealer Name'. The first row in the table shows '24400', 'Swanson', and 'Blush Kitchens Co.'. A red arrow points from the 'Reset Revisions' option in a dropdown menu to the 'New Orders' tab. The dropdown menu is open, showing various actions: Review, Transfer bid, Room List, Edit Bid Details, Clone, Create Hotlist, Export to XML, Export to Excel, Lock for Review, Send Back, Reset Revisions, Delete, and Archive. The 'Reset Revisions' option is highlighted in grey. A red text annotation next to the arrow reads: 'Reset revisions to act as a new submission'.

Updates to pricing enforcement

This update improves on some of the features pertaining to pricing dates.

1. When a bid's pricing date is set to expire within the next three weeks there will be a little clock icon next to the price of the bid.
